Travel to Hong Kong all you need to know

Update on 13 Dec 2022
Please refer to the www.hkepc.gov.hk website for the latest information on travel requirements.

Before departure

Be fully vaccinated.

(Refer to the below table for a list of acceptable vaccines)

Before travel, refer to Hong Kong’s re-entry requirements for travel restrictions.

Report your pre-departure Rapid Antigen Test (RAT) result conducted at least 48 hours prior to arrival.

After submitting the result, you will be required to present a complete Health Declaration Form.

After arrival

Follow the 'test-and-go' arrangement to take a PCR-based nucleic acid test.

You can use the Hong Kong Health Code app to scan the QR code to access the Health Code system. After scoring the result, a text message will be sent to you with the result of your test.

3 Testing arrangements

Take a daily rapid antigen test (RAT) until Day 5 (the day of arrival is Day 0). A negative result must be obtained before leaving your place of residence.

On Day 2, after obtaining a negative RAT result, you must take 1 PCR-based nucleic acid test. After completing the test, you will receive a receipt with a QR code for your record. You can use the Hong Kong Health Code app to scan the QR code to access the Health Code system. After scoring the result, a text message will be sent to you with the result of your test.

Tip: get a local SIM card while in Hong Kong to receive SMS notifications of the results of your PCR-based nucleic acid tests.

4 Provisional Vaccine Pass for visiting specified premises

During your stay in Hong Kong, you are required to present your Provisional Vaccine Pass to the “Lantau Pass” at specified premises, such as restaurants and bars.

You can also use your Provisional Vaccine Pass on-line or via mobile application for easy access.
