

Download instruction

The minimum system requirements for installing the 'HK Cyclothon: Virtual Race' game app is Android 8.0 or higher. It is not guaranteed that the 'HK Cyclothon: Virtual Race' game app installed at Android 7.x or lower will work properly.

Android 8.0 or higher:

1. Select 'Settings'
2. Select 'Apps & notification'
3. Select 'Special access' (tap the 'Menu' icon in the top right corner and then select 'Special access' if it is not shown in the list)
4. Select 'Install unknown apps'
5. Locate and select the particular app that you used to open the installation package in the list (eg Chrome browser app or File Manager app)
6. Enable option 'Allow from this source'
7. Tap or scan the QR code below to download the 'HK Cyclothon: Virtual Race' APK file
8. Open the downloaded APK file to install
9. Repeat steps 1–5 above and then disable option 'Allow from this source'

Android 7.9 or lower:

1. Select 'Settings' from the main screen or the app list
2. Select 'Lock screen and security' or 'Security'
3. Enable the option 'Unknown sources' and tap 'OK' in the alert dialog window
4. Tap or scan the QR code below to download the 'HK Cyclothon: Virtual Race' APK file
5. Open the downloaded APK file to install
6. Repeat steps 1 and 2 above and then disable the option 'Unknown sources' and tap 'OK'
